

Languages: 'ours' & 'theirs'

- Role, purpose of expertise; vis a vis participation; 'participation is difficult'
- growing importance of social sciences aspects
- what do people think about, do in/with landscape? Do they use 'landscape' as a concept? Use visual language.
- People do or don't know what landscape is? A very basic question!
- Uncertainty levels rising in environmental science; an opening for 'landscape's' subjective language?
